

## Price Sheet

ForceFinder is available as a fully hosted service, or as a self-hosted licensed solution with or without source code.

### **Hosted Service Pricing**

**Service Start Up Fee:** \$849 (\$495 on additional boards)  
**Monthly Fee:** \$295 (for a one year term)

Start up fee includes creation of the job board 'wrapper'/private labeling, configuration and customization, and training. Monthly fee include ongoing management of the hosting 'platform', ongoing feature upgrades and customer support. Start up fee for first job board includes training.

### **Self-Hosted License Pricing**

Self-hosted software license fees are based on two factors: the number of job boards/domains, and whether or not source code is included. There is an initial (one time) software license fee in addition to an annual license renewal fee.

#### **Initial (one-time) Software License Fee:**

| <b>Job Boards / Domains</b> | <b>No Source Code</b> | <b>With Source Code</b> |
|-----------------------------|-----------------------|-------------------------|
| 1                           | \$8,500               | \$12,500                |
| 2 – 5                       | \$14,500              | \$21,500                |
| 6 – 20                      | \$22,500              | \$31,500                |
| Unlimited                   | \$32,500              | \$44,500                |

#### **Annual Software License Renewal Fee:**

Beginning in year two there is an annual self-hosted license renewal fee equal to 20% of the initial license fees paid to date. Self-hosted license includes installation of the software on customer's server, creation of the job board 'wrapper'/private labeling, configuration and customization, and training. Some customers start with the ForceFinder hosted service before moving to a self-hosted solution.

### **Credit Card Processing**

If customer chooses to accept online credit card payments customer will need a credit card 'gateway' account. The ForceFinder system currently interfaces with four gateway providers: Authorize.net, Verisign/PayPal, InternetSecure and FirstData. The Authorize.net solution is fully PCI compliant. Most of these providers do not charge to establish a gateway account. Monthly fees and transaction fees vary between these providers and we encourage our customers to research the terms of each to determine which is the best fit. Customers pay the gateway provider directly for their services. Revenue from sales on the customer's job board flows directly into the customer's account – not through a ForceFinder account.
